| RD-004 | REQUIREMENTS FOR RADIOACTIVE WASTE MANAGEMENT: MINING AND MINERALS PROCESSING | 0 | 2 of 2 |

1. RADIOACTIVE WASTE MANAGEMENT

- 1.1 A programme approved by the National Nuclear Regulator (NNR) shall be implemented to control the handling, processing, storage and disposal of radioactive waste.

The programme must have:

- provision for the identification of radioactive wastes from all locations where the generation of such waste may arise,
- a system to categorize radioactive wastes and determine how such wastes shall be processed and packaged and where the wastes are to be stored or disposed of,
- procedures to determine the nuclide-specific radioactive content of all wastes stored or disposed of,
- a system of record keeping which details the content of all packages of radioactive waste, the nature of the packaging material, and where the material is stored or where the material was disposed of.

- 1.2 A quarterly report shall be made to the NNR detailing the information recorded in terms of the above paragraphs for the period in question
