RADIATION AWARENESS WORKSHOP

Understanding Radiation Safety in the Scrap Metal Industry

The National Nuclear Regulator (NNR) is hosting a workshop aimed at promoting radiation safety awareness and regulatory compliance within the scrap metal sector.

The workshop will provide practical information on the safe identification and management of radioactive material that may inadvertently enter the scrap metal recycling stream, as well as the regulatory obligations applicable to scrap metal facilities.

Identify

Recognising radioactive material in the scrap metal stream.

Manage

Safe handling, reporting and management practices.

Comply

Understanding your regulatory obligations and responsibilities.

Protect

Promoting safe practices to protect people, property and the environment.

WORKSHOP DETAILS

Tuesday, 15 September 2026

VENUE

South African Iron and Steel Institute (SAISI)
Conexlink Offices, Ground Floor
Rust Building, 1 Frikkie Meyer Street
Pretoria West, Pretoria, South Africa.
